Step 1: Choose an Amazon Machine Image (AMI)

An AMI is a template that contains the software configuration (operating system, application server, and applications) required to launch your instance. You can select an AMI provided by AWS, our user community, or the AWS Marketplace; or you can select one of your own AMIs.

Search for an AMI by entering a search term e.g. "Windows"

PART-3

The screenshot shows the AWS Management Console for an EC2 instance. The instance is named 'ec2-user@ip-172-31-39-254' and is in the 'running' state. The console displays the instance's details, including its public IP address (54.172.206.161) and the AMI ID (amzn2-ami-hvm-2.0.20200304.0-x86_64-gp2). The 'Launch Instance' button is visible at the top, and the 'Connect' button is also present. The console also shows the 'Actions' menu and the 'EC2 Dashboard' link.
